Title: Site Management after remediation

Date: 06/13/05

Identifier: 2005-RF-08

Lessons Learned Statement: Rocky Flats instituted a permit process to enter remediated areas on site

Discussion of Activities: To protect reseeded and regarded areas, KH instituted a permit system by which people checked in at a central point to obtain a permit and flag marker for vehicles that will be going into already completed areas.

Analysis (May be incorporated into the Discussion): This allows for control of site personnel and education of site visitors as to which areas are sensitive to disturbance.
